

SugarCRM for LotusLive provides sales, marketing and customer support professional with a fully integrated user experience; all the power and flexibility of LotusLive File Sharing and Online Meetings without ever leaving the Sugar application. SugarCRM for LotusLive is a cloud-based solution. No software installation is required and it is accessible from anywhere, at anytime.

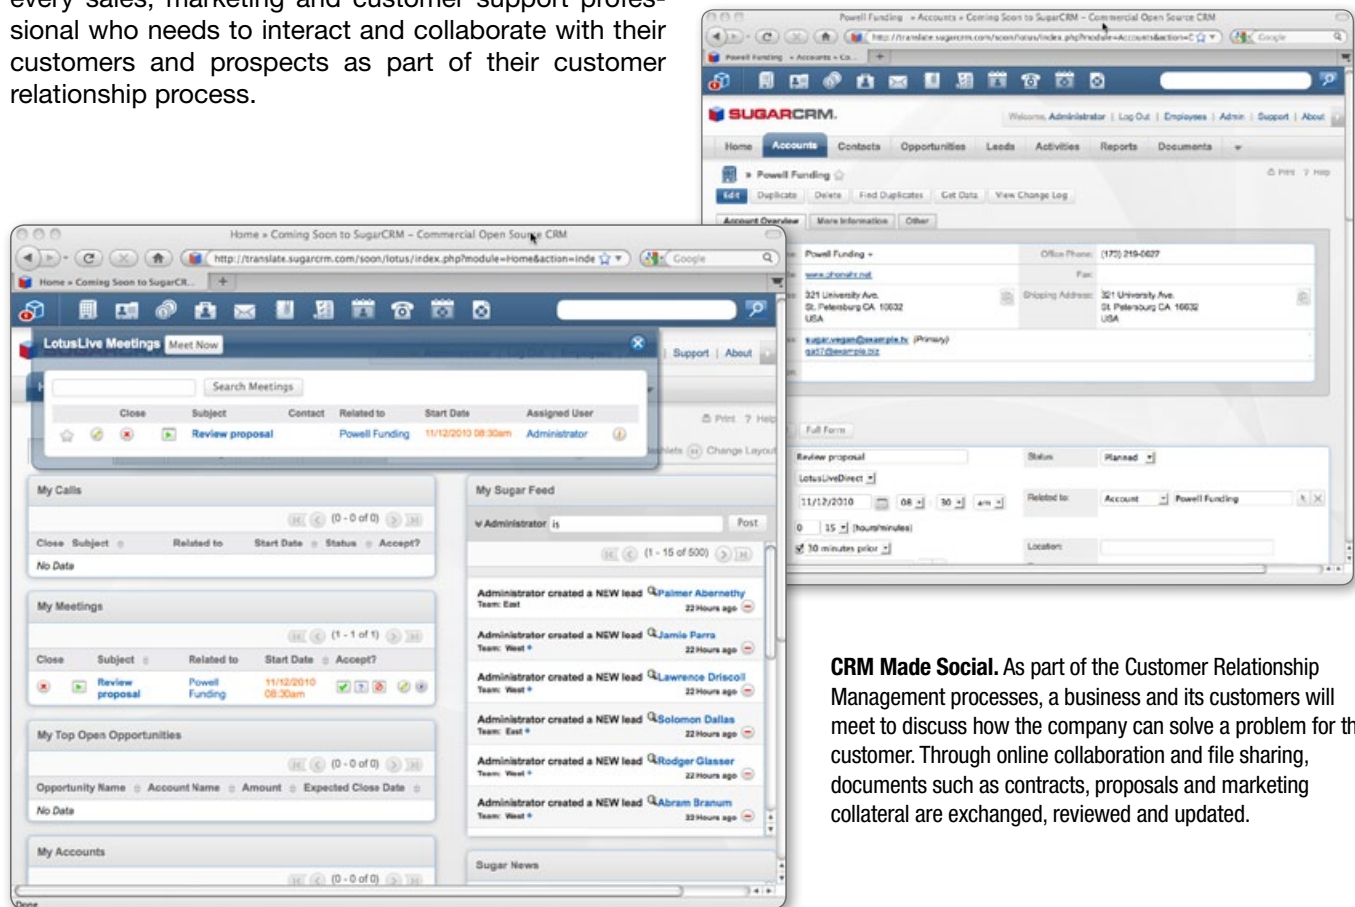

SugarCRM for LotusLive offers a fully integrated customer relationship management and online collaboration solution that simplifies working with prospects and customers during the lead generation, lead to cash and issue resolution processes.

SugarCRM for LotusLive is a must have solution for every sales, marketing and customer support professional who needs to interact and collaborate with their customers and prospects as part of their customer relationship process.

Schedule, Manage and Start Online Meetings from inside Sugar

With SugarCRM for LotusLive, sales and customer support professionals can easily schedule, manage and start their LotusLive Meetings directly from within Sugar.

- Seamless integration between Sugar and LotusLive
- Manage your meetings at the account, contact, opportunity and support case level
- Easy access to LotusLive Meetings in the Sugar shortcut bar
- Support for both video and Web conferencing service
- Security-rich service via HTTPS and is encrypted with 128-bit SSL
- Both LotusLive and Sugar come with multilingual support.
- Easy to set up and attend with one permanent meeting ID
- Accessible anytime, anywhere through a Web browser
- No downloads for participants – fewer meeting delays

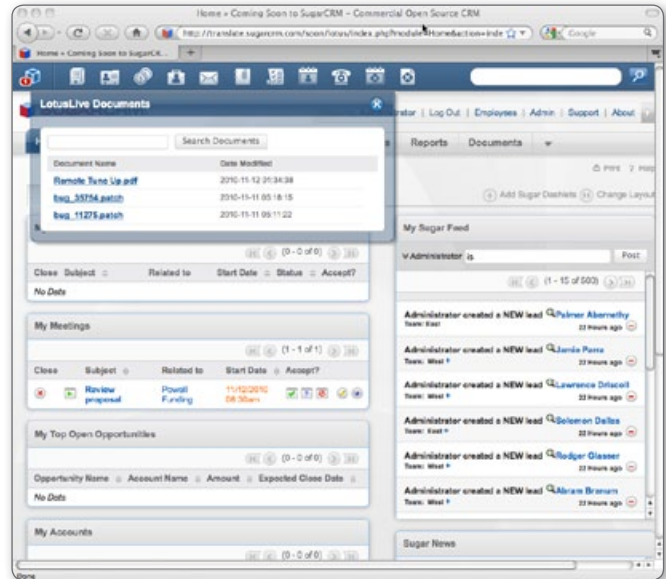

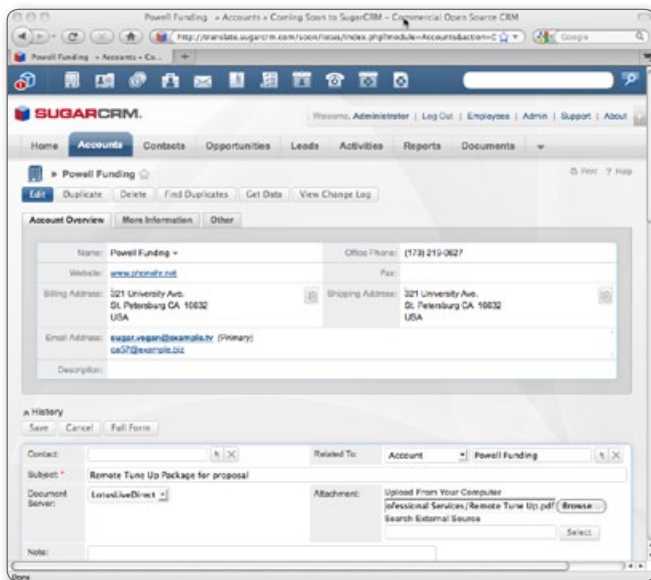

CRM Made Social. As part of the Customer Relationship Management processes, a business and its customers will meet to discuss how the company can solve a problem for the customer. Through online collaboration and file sharing, documents such as contracts, proposals and marketing collateral are exchanged, reviewed and updated.

Manage Documents in Sugar and Share them with LotusLive

With SugarCRM for LotusLive, sales and customer support professionals can attach notes and documents to an account, contact, opportunity or support case inside Sugar and share them with the customer or prospect via LotusLive.

- Seamless integration between Sugar and LotusLive
- Manage your documents at the account, contact, opportunity and support case level and share them with your customer and prospect using LotusLive
- Easy access to LotusLive Documents in the Sugar shortcut bar
- Security-rich service via HTTPS and is encrypted with 128-bit SSL
- Secure guest access allows you to restrict external File Sharing to specific documents for specific guests
- Both LotusLive and Sugar come with multilingual support.
- Accessible anytime, anywhere through a Web browser

Who can use SugarCRM for LotusLive?

Almost anyone! Whether you are a small business working with clients across town, or a large enterprise with customers and prospects around the world, SugarCRM for LotusLive is a secure and scalable yet flexible and intuitive solution that allows sales, marketing and customer support professionals to manage their customer relationships and share documents and manage their online meetings all from a single, integrated solution. And since it is a cloud-based application, no software is required and it can be accessed from anywhere, anytime.
